For decades, the U.S. exported jobs and imported products, while other countries surpassed us in critical sectors like infrastructure, clean energy, semiconductors, and biotechnology. Thanks to President Biden's Investing in America Agenda – including historic legislation passed by Congress and signed into law by President Biden such as the American Rescue Plan, Bipartisan Infrastructure Law, CHIPS and Science Act, and Inflation Reduction Act – that is changing.

President Biden's Investing in America agenda is mobilizing historic levels of private sector investments in the United States, bringing manufacturing back to America after decades of offshoring, and creating new, good-paying jobs, including union jobs and jobs that don't require a college degree. His Investing in America agenda is rebuilding our roads and bridges using Made in America materials, built by American workers. And it's transforming our country for the better – reaching communities in every corner of the United States, including those that have too often been left behind. This website provides an interactive map that illustrates the impact of these record-breaking levels of public and private investment across states and territories under the Biden Administration.
