Bipartisan Infrastructure Law

The Bipartisan Infrastructure Law (BIL), previously referred to as Infrastructure Investment and Jobs Act (IIJA), provides \$17.1 billion for U.S. Army Corps of Engineers' Civil Works programs, projects and activities that will provide a historic opportunity to address the nation's current and future water resources infrastructure needs for the benefit of the American public.

Over the past two years, the U.S. Army Corps of Engineers has had nearly 50 agreements and over 100 construction activities underway, thanks to funding from the Bipartisan Infrastructure Law.

These projects are making a difference for communities across the nation, from protecting against floods to boosting commerce to preserving and enhancing aquatic habitats.

The Corps' portfolio of Bipartisan Infrastructure Law projects is making a real difference for communities across the nation. These projects are protecting people and property from floods, boosting the economy, preserving the environment, and promoting equity.
