

#### 📃 📔 Greenhouse Gas Emissions

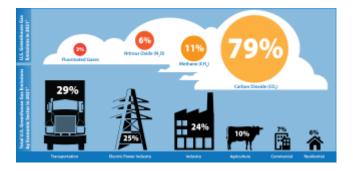

Q

# State and Tribal Greenhouse Gas Data and Resources

EPA publishes annual state and Tribal-level GHG data and resources. Learn more about each using the links below and find <u>answers to frequently asked questions (pdf)</u> about the data and resources.

## Inventory of U.S. Greenhouse Gas Emission and Sinks by State

EPA compiles and publishes <u>annual state-by-state GHG</u> <u>data</u> consistent with the national *Inventory* and international reporting guidelines, meaning state GHG totals when summed, will equal totals in the national *Inventory*. <u>Learn more about EPA's state-level GHG</u> <u>estimates and underlying methods</u>.

## **State Inventory and Projection Tool**

EPA has also developed the <u>State Inventory and Projection Tool (SIT)</u>, an interactive spreadsheet tool designed to help states develop greenhouse gas emission and removal inventories and projections and lessen the time it takes to develop and/or update an inventory. The SIT uses data from the *Inventory of U.S. Greenhouse Gases and Sinks by State* as well as other federal sources and allows users to customize their data inputs. Learn more about differences and planned updates (pdf).

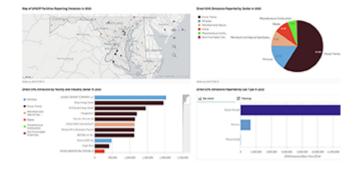

# State-level Non-CO<sub>2</sub> Emission Projections and Mitigation Potential

EPA has developed additional <u>state-level data</u> to help states assess technical and economic mitigation potential for non-CO<sub>2</sub> GHGs from anthropogenic sources. Non-C🔘<sub>2</sub>

Greenhouse Gas Data Tool

#### Greenhouse Gas Reporting Program (GHGRP) State and Tribal Fact Sheets

EPA requires <u>reporting of greenhouse gas (GHG) data</u> and other relevant information from large GHG emission sources, fuel and industrial gas suppliers, and CO<sub>2</sub> injection sites in the United States. Annual GHGRP emissions data is now summarized in interactive fact sheets by state, tribal lands, or EPA region. Users can also download facility data based on the criteria selected. Facility-level data by state is a subset of overall state-level GHG emissions.
